

TANK BOSS

The Tank Boss is a versatile solution for monitoring various chemicals including brine or additives. The radar-based sensing technology connects seamlessly to the web-based PreCise MRM platform ensuring real time data access from anywhere, even the most remote sites.

This provides a reliable and accurate monitoring solution for the most demanding industrial environments.

FEATURES

- ✓ Chemical Monitoring
Brine or Additive Chemicals
- ✓ Cellular Connection
Connection with web-based PreCise MRM Platform
- ✓ Tank Level Notifications
Notifies low tank levels via email or text as well as monitoring on a web based dashboard
- ✓ Location Pin Map
- ✓ Multiple Connections
Capability to connect and monitor up to 4 tanks
- ✓ Accuracy within 4mm
- ✓ No contact monitor
Radar based sensing that monitors liquids without making physical contact to them offering improved safety and reduced contamination
- ✓ Compatible with any size storage tank up to 45 feet in height
- ✓ Land powered or Solar powered with battery backup
