

HIGH-CAPACITY SLURRY POWER UNIT

The High Capacity Slurry Power Unit is designed for low volume granular prewetting, high volume three lane anti-ice applications, and anything in between. This system is ideal for new or retrofit situations that require multi-purpose liquid application.

FEATURES

- ✓ Heavy duty 304 stainless steel enclosure
- ✓ Cast iron driven centrifugal pump offers 0.8 to 110 GPM with 17 GPM hydraulic flow
- ✓ Magnetic flowmeter with no moving parts means no clogging and is virtually maintenance free
- ✓ Compatible with nearly any closed loop spreader control system
- ✓ Rugged wire reinforced EPDM hoses
- ✓ Compact design allows for seamless installation
- ✓ Great value in reducing the need for multiple power units
